

## PLATINUM PTZ ULTRA CONC.

Platinum PTZ Ultra Conc. is a high quality, high concentration thickener, for pigment printing for the textile printing industry.

Platinum PTZ Ultra Conc. is suitable for thickening pigment printing paste as well as for printing on cotton, polyester-cotton and all synthetic textiles, or printing on fabrics containing residual electrolyte where conventional thickeners give flushing of print color. It is fine aqueous acrylic copolymer dispersion in high purity mineral oil which disperses readily in water and rapidly produces smooth pastes.

Platinum PTZ Ultra Conc. is designed for very convenient preparation of pigment printing formulations which can be effectively thickened by direct addition to the mixture or it can also be used as part of the customer's specific thickener stock preparation (with or without ingredients other than the pigment itself.) PLATINUM PTZ ULTRA CONC has high active content reducing handling and storage.

**APPEARANCE** : White viscous liquid

**POLYMER CHARGE** : Anionic

**COMPOSITION** : Acrylic Co-polymer

**BULK VISCOCITY** : <3500 CPS  
Brookfield LVT – 30 rpm

**Packing:-**  
60/130 KGS PLASTIC CARBOUYS

**Storage:**  
Store in a cool dry place. Avoid storing in direct sunlight.

### STATEMENT

This Technical Manual is edited based on our current experience and knowledge only for free reference purpose. Information mentioned above cannot be taken as any guarantee because many factors may affect the product effect. Customers must test the products according to their own practical situation to ensure the product can meet their requirements.
