

## THICKENER PTE

Thickener PTE is a high quality, high concentration thickener, for pigment printing specifically for the Textile Printing Industry.

Thickener PTE is suitable for thickening pigment printing paste as well as for printing on cotton and all synthetic textiles. It is fine aqueous acrylic copolymer dispersion in high purity mineral oil which disperses readily in water and rapidly produces smooth pastes.

Thickener PTE is designer for very convenient preparation of pigment printing formulations which can be effectively thickened by direct addition to the mixture or Thickener PTE can be used as part of the customer's specific thickener stock preparation (with or without ingredients other than the pigment itself). Thickener PTE has high active content reducing handling and storage.

### PROPERTIES:

- **Appearance** : White viscous liquid
- **Chemical composition** : Acrylic copolymer
- **Polymer charge** : Anionic
- **Bulk viscosity** : <3000cps

### PACKING : 130 KGS DRUM

### STORAGE:

- Store in a cool and dry place avoid storing in direct sunlight.

### STATEMENT

This Technical Manual is edited based on our current experience and knowledge only for free reference purpose. Information mentioned above cannot be taken as any guarantee because many factors may affect the product effect. Customers must test the products according to their own practical situation to ensure the product can meet their requirements.
